

FLASH LININGS – HOW TO ORDER

- On the reverse of each swatch is a lining code – at the end of the code is a letter – on the example below the lining charge is C \$140 for a jacket
- For those of you who don't have an actual swatch book but have a printed book, I have attached a list of the codes and their price points
- When you input the lining within the lining box you select either FREE or ONEWAY – this is important as it dictates how much lining we order for your customer, if we get it wrong we will have to re-order the lining
- When you charge for the lining – you select the extras on the jkt and you tick the box for the lining. This will add the appropriate price to the order. The applicable discount is taken off the cloth only.
- Examples of this are below. Please pay particular attention to the initialled lining – this is a great way of making a garment bespoke and really enhances our product to those customers whose lining is available to order
- UPC's should be supplied shortly – in the meantime use the \$20 code x 7 for \$140
- As always if you have any queries please ask
